

New England Restructuring Roundtable

Stakeholder Investing and Integrating to
Benefit Customers

September 20, 2024

nationalgrid

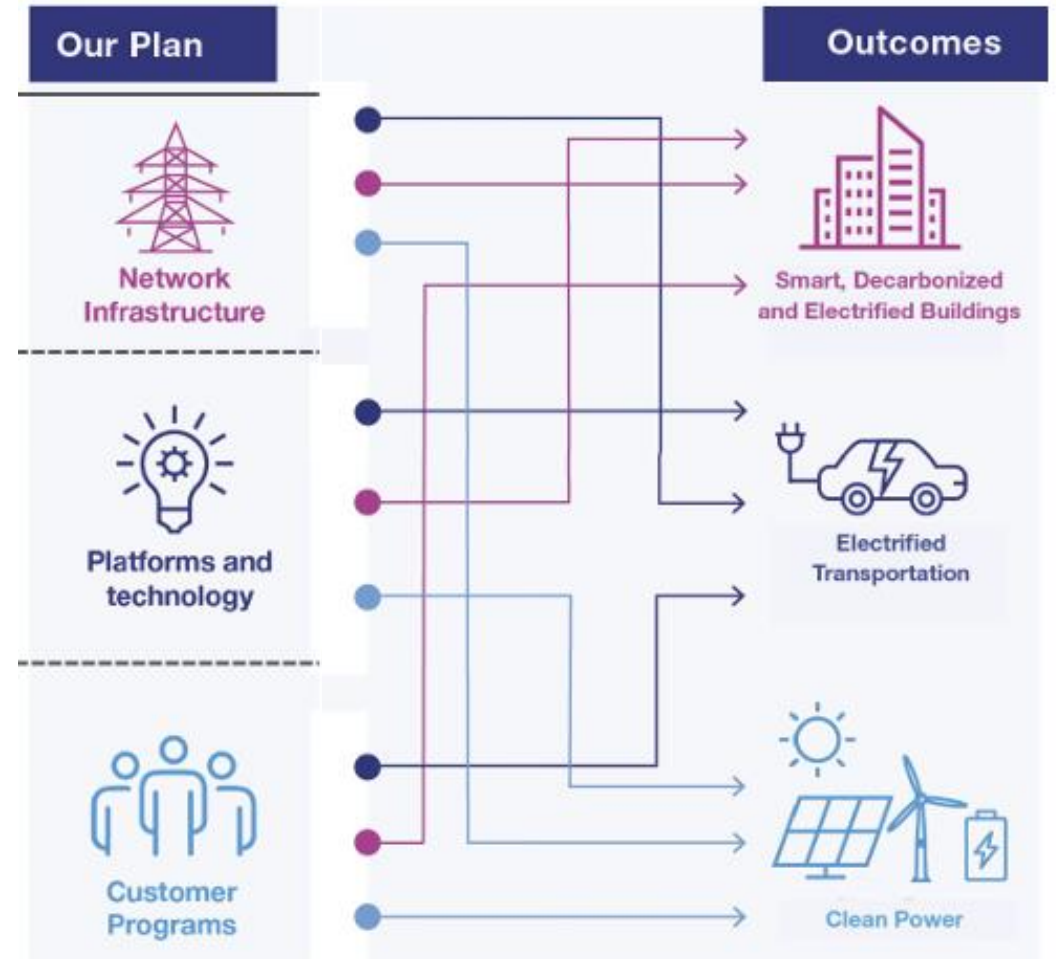

Modernizing distribution networks for greater distributed energy generation and electrification

“Grid Mod” (Grid-facing Tech & AMI)

Our Future Grid Plan (ESMP)

Building transmission and deploying grid-enhancing technologies for a clean energy future

Brayton Point Clean Energy Hub

GETs: Dynamic Line Ratings (“DLR”)

- Enabling offshore wind more cost-effectively
- Delivering economic and community benefits

- Early deployments in MA and NY
- Increasing capacity based on actual conditions

Prioritizing affordability, cost effectiveness and equity while preparing the workforce of the future
